Product Overview

High-Efficiency Wet Grinding Solution

This industrial-grade grinding machine is engineered for the precise processing of wet materials, making it an essential component for food, pharmaceutical, and chemical production lines. It excels at grinding, emulsifying, homogenizing, and mixing semi-humid bodies and emulsion substances. Designed to meet advanced international technical standards, it ensures consistent output for products like soy milk, pastes, syrups, and cocoa-based mixtures.

Applications

Suitable Materials

- Cocoa beans
- Soybeans
- Bean paste
- Soy milk
- Syrup
- Nutrient solutions
- Ointments
- Paint
- Pigments
- Dyes

Industries Served

Food Processing, Pharmaceutical, Chemical Industry

Service & Warranty

After-Sales Support

The machine includes lifelong maintenance support. Warranty coverage applies to defects arising from machine design. Technical support is available for operational issues, though user-caused damage is the responsibility of the operator.

Warranty Period

1 Year
