

Coffee Harvesting Shaker

This professional-grade coffee shaker is designed for efficient harvesting. It features a robust engine, adjustable shaking intensity, and ergonomic handle for comfortable operation.

Product Overview

Professional Harvesting Efficiency

The Coffee Harvesting Shaker is engineered for high-efficiency coffee cultivation, significantly increasing harvesting capacity while reducing manual labor requirements. Designed for commercial farm operations, this professional tool balances powerful engine performance with ergonomic handling to maximize crop yields. Its robust design ensures reliable operation in demanding agricultural environments.

Technical Specifications

Harvesting Performance Metrics

130 kg/h

Total Harvesting Capacity

Engine Displacement	32.7 cc
Engine Power	1.2 kw
Net Weight	7.3 kg

Operational Details

Fuel Specification	Gasoline 25: Two-cycle oil 1
Fuel Tank Capacity	1000 ml
Pipe Diameter	26 mm
Available Handle Lengths	1.5m, 2.0m
