

# Coil Nails for Pneumatic Nail Guns

Coil nails are collated fasteners designed for use in pneumatic nail guns. These nails are connected by a wire or plastic strip and are coiled for continuous feeding.

## ADDITIONAL IMAGES

## Product Overview

### Professional Coil Nails

These high-quality collated nails are specifically engineered for use with pneumatic nail guns to ensure rapid and efficient fastening. Designed for durability and performance, they are ideal for demanding environments such as furniture assembly, sofa construction, and wooden box manufacturing. Their coiled configuration allows for continuous, high-volume feeding, significantly increasing productivity on the job site.

## Technical Specifications

Material	Q235 Steel
Diameter Range	3.7 mm
Length Range	25-130mm

## Packaging & Logistics

Coils per Box	10-40
Pieces per Coil	125-350

## Operational Safety

Recommended Operating Pressure	8 kgf/cm <sup>2</sup>
Certifications	CE

## Applications

### Suitable Applications

- Furniture making
- Sofa construction
- Wooden box assembly
