

Coil Winding Machine for Acoustic Components

Precision winding machine designed for speaker, trumpet, and buzzer coil production. Features include dual winding heads, adjustable tension control, and a user-friendly control panel for precise parameter adjustments.

Overview

Professional Acoustic Component Winding

The Model CF-005 is a high-precision winding machine engineered specifically for the manufacturing of acoustic components such as speakers, trumpets, and buzzers. It features dual winding heads and advanced tension control systems to ensure high-volume output with exceptional consistency. The integrated control interface allows for precise parameter adjustments, making it an ideal solution for reliable, large-scale production environments.

Technical Specifications

Model Number	CF-005
Winding Heads	2

Key Features

Performance Metrics

2 heads

Winding Heads

Key Capabilities

Speaker Coil Production, Trumpet Coil Winding, Buzzer Coil Winding, Adjustable Tension Control
