

Coiled Telephone Handset Cord

This is a coiled telephone handset cord used to connect a telephone handset to the base unit. It features RJ9 or RJ10 connectors at both ends for secure and reliable voice transmission.

Product Overview

Professional Coiled Handset Cord

The YX0013 coiled telephone handset cord provides a reliable connection between the telephone base unit and the handset. Its coiled design is engineered to offer flexibility and reduce cable tangling during daily use, promoting a clean and efficient workspace. This cable ensures consistent, high-quality voice transmission for professional communication environments.
