

Collapsible Galvanized Steel Wire Mesh Container

This steel wire mesh container is ideal for storing and transporting car parts, ensuring both safety and durability. Its galvanized frame and mesh provide an attractive appearance suitable for outdoor use, while its foldable design allows for vertical storage and space saving.

Product Overview

Industrial Wire Mesh Container

This collapsible galvanized steel wire mesh container is engineered for efficient industrial and warehouse logistics. Featuring a robust construction, it provides excellent visibility and ventilation while ensuring secure stacking capabilities. Its unique design allows for easy operation with hydraulic pallet trucks or elevators, significantly reducing labor costs and optimizing storage space when collapsed.
