

Collapsible Steel Wire Mesh Storage Pallet

This collapsible steel pallet is designed for heavy-duty storage and material handling. It features a robust wire mesh cage construction with a steel base for enhanced stability and durability.

Product Overview

Industrial Storage Solution

This collapsible steel wire mesh storage pallet is engineered for the efficient handling, storage, and transport of heavy, small to medium-sized industrial components. Its robust wire mesh cage design eliminates the need for additional packaging materials, effectively reducing operational costs. Designed for versatility, the unit features a collapsible structure for space-saving storage when not in use and is built to withstand demanding warehouse and factory environments.

Design & Construction

Construction Material	Steel Wire Mesh
Key Features	Collapsible, Stackable, Heavy-duty, Corrosion-resistant

Usage & Application

Best Suited For

- Warehouse storage
- Factory material handling
- Distribution centers
- Transport of small to medium components
