Product Overview

Collapsible Steering Column Assembly

This collapsible steering column is engineered for high-performance automotive applications, prioritizing both driver safety and precise handling. The unit features an impact-absorbing mechanism designed to reduce collision-related injury while offering adjustable height and reach for improved driver comfort. Built from high-strength steel, this assembly meets or exceeds OEM standards for reliability and long-term durability.

Technical Specifications

Maximum Static Torque

1000 N.m

Max Static Torque

Production Capacity

100000 pcs/year

Features

Core Benefits

- Collapsible design for impact energy absorption
- Adjustable height and reach configuration
- High-strength steel construction
- Precise steering shaft alignment
- OEM specification compliance

Compliance & Compatibility

Application Compatibility

Automotive, OEM Standard, Multi-model
