

Collapsible Wire Mesh Container with Half Drop Gate

This collapsible wire mesh container is designed for efficient storage and transportation of auto parts. It is constructed from durable steel wire with a bright zinc plated finish and features a half drop gate for easy access.

Product Overview

Durable Storage Solution

This collapsible wire mesh container is engineered for the efficient storage and transportation of automotive parts and industrial goods. Constructed from high-quality steel wire with a bright zinc-plated finish, it offers excellent corrosion resistance and long-term durability. The stackable design and half-drop gate feature optimize warehouse space and provide easy access to contents during handling.

Key Features

Core Functionalities

- Collapsible design for space-saving storage when not in use
- Half drop gate for convenient access to stored items
- Stackable configuration to maximize vertical warehouse space
- Zinc plated finish for enhanced rust and corrosion protection

Technical Specifications

Surface Treatment

Bright Zinc Plated

Material

Steel Wire

Applications

Recommended Industries

Automotive Manufacturing, Warehousing, Distribution, Logistics
