

Collated Framing Nails for Pneumatic Nail Guns

These collated framing nails are designed for use in pneumatic nail guns. They are typically joined together with a plastic or wire collation, allowing for rapid and efficient fastening in framing, sheathing, and other construction applications.

Product Overview

Professional Framing Solutions

These collated framing nails are engineered specifically for high-efficiency pneumatic nail gun applications. Designed to facilitate rapid fastening, they are ideal for framing, sheathing, and various heavy-duty construction tasks. Featuring a smooth shank and diamond point, these nails ensure both easy driving and superior holding power for reliable structural integrity.

Technical Specifications

Fastener Type	Collated Framing Nails
Shank Design	Smooth
Point Type	Diamond Point
Collation Method	Plastic, Wire
Compatibility	Pneumatic Nail Guns

Application

Primary Applications

- Framing
- Sheathing
- Construction Fastening
