

Collated Pneumatic ST Nails

Collated ST nails are designed for pneumatic nail guns. They are used for fastening wood and other materials in construction and woodworking.

Product Overview

Collated Pneumatic ST Nails

These professional-grade collated ST nails are engineered specifically for pneumatic nail gun systems, ensuring seamless operation and consistent feeding. Designed for reliability in demanding construction and woodworking environments, they offer superior holding power and structural durability. The collation technology minimizes reloading downtime, allowing for maximum efficiency during high-volume fastening tasks.

Technical Specifications

Key Performance Features

- Optimized for pneumatic systems
- Consistent collation for reliable feeding
- High holding power
- Durable material construction

Nail Type	Collated ST Nails
Common Applications	Construction, Woodworking, Material Fastening
