

Color-Coated Steel Cutting Saw Blade

This steel cutting saw blade features a specialized color coating for enhanced durability and reduced friction. Its robust construction and optimized tooth geometry ensure smooth operation, minimal vibration and clean cuts.

Product Overview

Precision Steel Cutting Solution

This high-performance steel cutting saw blade is engineered for professional applications requiring precise and efficient material processing. Its specialized color coating significantly enhances durability while reducing friction during operation, ensuring a longer blade lifespan. With a robust construction and optimized tooth geometry, the blade delivers clean cuts and smooth operation with minimal vibration.

Technical Specifications

Application	Steel cutting
Key Features	Color-coated, Reduced friction, Enhanced durability, Optimized tooth geometry, Low vibration

Performance Metrics

Operational Benefits

1 High

Cut Quality

1 Minimal

Vibration Level
