

Color-Coded Banana Plugs for Audio Equipment

These banana plugs are designed for connecting wires to equipment in electronics and audio applications. The plugs feature a spring-loaded tip for a tight fit and are color-coded for easy identification of polarity.

Product Overview

Professional Grade Connectivity

These color-coded banana plugs are designed for reliable and secure connection of wires to audio equipment. Featuring a spring-loaded tip, they ensure a tight fit for optimal signal integrity in various electronic applications. The color-coded design simplifies polarity management, making them an essential tool for professional audio setups.

Technical Specifications

Design Features

- Spring-loaded tip for secure fit
- Color-coded for polarity identification
- Compatible with diverse audio equipment

Available Plating Options

Nickel, Gold
