

Combi Boiler Digital Display Unit

This digital display unit is designed for combi boilers. It shows temperature, pressure, and indicators for heating, hot water, radiator, and flame status.

Product Overview

Advanced Combi Boiler Control Interface

This digital display unit is designed for modern combi boilers, featuring a sleek, horizontal aesthetic with an IMD process finish. It incorporates a hidden LED screen and high-sensitivity touch buttons for an intuitive user experience. With built-in intelligent features like 24-hour timer programming, real-time clock display, and power-off memory, it ensures reliable and efficient boiler management.
