

Combination Belt and Disc Sander

This combination belt and disc sander is designed for woodworking and general sanding applications. It features an adjustable belt sanding arm, a tilting work table for both belt and disc sanding, and a dust collection port for a cleaner work environment.

Product Overview

Versatile Sanding Solution

This combination belt and disc sander is engineered for woodworking professionals and general sanding applications. It features an adjustable belt sanding arm and a tilting work table, allowing for precise operation on both belt and disc sanding surfaces. Designed for durability and stability, the unit includes an integrated dust collection port to maintain a cleaner workspace and variable speed control to accommodate various materials.

Technical Specifications

Maintenance & Safety

- Integrated dust collection port
- Robust construction for stability
- Variable speed control

Primary Applications

Woodworking • Edge Smoothing • Angle Shaping • Curve Sanding

Sanding Capabilities

Belt Sanding, Disc Sanding, Adjustable Arm, Tilting Table
