

Combination Electric and Steam Iron with Base Station

This combination appliance functions as both an electric iron and a steam iron. It features a compact design with an integrated base station for convenient use.

Product Overview

Professional Combination Ironing System

This combination electric and steam iron offers a versatile solution for garment care, featuring a compact, ergonomic design. Equipped with an integrated base station, it provides precise control over ironing settings to ensure optimal results on various fabric types. Its user-friendly interface and efficient steam delivery make it an excellent choice for consistent, high-quality fabric maintenance.

Key Features

Core Functionality	Steam Ironing, Electric Heating, Integrated Base Station, Compact Design
Primary Application	Household Washing and Drying Machinery

Technical Specifications

Color Scheme	White • Blue
Power Connection	Coiled power cord with base station integration
