

Combination Gas Burner and Induction Cooktop

This combination unit features both a gas burner and an induction cooktop. It is designed for efficient and versatile cooking with a stainless steel finish, cast iron grate, and touch controls.

Product Overview

Versatile Hybrid Cooking Solution

This combination unit seamlessly integrates a high-performance gas burner with a modern induction cooktop, offering the ultimate flexibility for professional kitchens. Designed for efficiency, it combines the tactile control of traditional gas flame cooking with the precision and speed of induction technology. The durable stainless steel finish and robust cast iron grate ensure longevity and ease of maintenance in demanding environments.

Technical Specifications

Control Interface

- Manual flame adjustment knob for gas
- Touch controls for induction
