

Combination Gas Burner and Induction Cooktop

This combination cooktop features both a gas burner and an induction cooking surface. It is designed for modern kitchens, offering both traditional gas cooking and advanced induction technology.

Product Overview

Hybrid Cooking Technology

This innovative cooktop combines the traditional control of a gas burner with the efficiency and precision of an induction cooking surface. Designed for modern kitchens, the unit features a durable stainless steel finish and robust cast iron grates for the gas section. It offers versatile cooking options, allowing chefs to switch seamlessly between gas and induction methods.
