

Combination Jointer and Table Saw

This woodworking machinery combines jointer and table saw functionalities. It features a precision-ground table surface, electric motor, and fence for guiding workpieces.

Product Overview

Professional Combination Machinery

This versatile combination machine integrates a high-precision jointer and table saw into one robust unit designed for professional woodworking environments. Engineered for stability and durability, the machine features a precision-ground table surface that ensures accurate material support for both ripping and crosscutting operations. Its integrated design allows woodworkers to switch seamlessly between edge jointing, planing, and sawing tasks within a compact footprint.

Technical Specifications

Build Quality

Heavy-duty construction • Precision-ground surface

Key Operational Functions

- Integrated edge jointing
- Planing capabilities
- Ripping operations
- Crosscutting operations

Equipment Type	Combination Jointer, Table Saw
Power System	Electric motor
Guidance Accessories	Adjustable fence included for material guidance
