Overview

Versatile Combination Machining

This combination lathe and milling machine offers a robust solution for diverse metalworking operations, integrating turning, facing, drilling, and milling capabilities into a single unit. Designed with a sturdy lathe bed, headstock, tailstock, and vertical milling head, it provides the precision required for shaping and finishing metal, wood, or plastic workpieces. Ideal for small-scale workshops, model engineers, and industrial applications, this machine features intuitive manual controls for accurate tool positioning.

Technical Details

Compatible Materials

- Metal
- Wood
- Plastic

Model Identifier

AT300-2

Machining Capabilities

Turning, Facing, Drilling, Milling

Construction

Key Components

- Lathe Bed
- Headstock
- Tailstock
- Cross Slide
- Vertical Milling Head
- Column

Finish

Blue • Gray
