

Combination Pliers - Hardened Steel Jaws, Insulated Grip

These combination pliers are designed for gripping, cutting, and bending various materials. They feature hardened steel jaws for durability and insulated handles for safe use.

Product Overview

Professional Combination Pliers

These German-style combination pliers are engineered for versatility, offering reliable performance in gripping, cutting, and bending tasks. Constructed from high-quality chrome vanadium steel with a durable nickel-plated finish, they are built to withstand demanding professional use. The ergonomic two-color insulated handle ensures both comfort during extended operation and safety for electrical applications.
