

Combination Pliers with Ergonomic Grip

Combination pliers are designed with precision-machined jaws for gripping, twisting, and cutting various materials. Ergonomically designed handles with yellow and black grips provide comfort and control during use.

Product Overview

Professional Grade Combination Pliers

These combination pliers are engineered for durability and precision, featuring high-quality CRV alloy steel construction. The cutting edges undergo a specialized heat treatment process to ensure long-lasting sharpness and reliable performance. Designed with user comfort in mind, the bi-material PP+TPR handle provides an ergonomic grip suitable for extended use in electrical, mechanical, and general repair tasks.
