

# Combination Tail Light Assembly for Motorcycles

This rectangular combination tail light assembly features dedicated sections for brake, turn signal, and reverse light functions. The durable plastic housing and high-impact acrylic lens provide protection and clarity.

## Product Overview

### Versatile Combination Tail Light Assembly

This rectangular combination tail light assembly is engineered for durability and high performance in various vehicle applications. Featuring a multi-compartment design, it integrates brake, turn signal, and reverse light functions into a single, robust unit. Constructed with a high-impact acrylic lens and a durable plastic housing, it ensures long-lasting visibility and resistance to environmental elements.

## Technical Specifications

### Safety Standards

DOT Compliant • SAE Compliant

### Integrated Functions

Brake Light, Turn Signal, Reverse Light

## Construction & Materials

### Lens Material

High-impact acrylic

### Housing Material

Durable plastic

## Installation & Compatibility

### Compatible Equipment

- Motorcycles
- Trailers
- Agricultural equipment

### Included Components

- Mounting hardware
- Wiring instructions
