

Combination Upright and Chest Freezer Showcase

This combination unit features both an upright freezer on top and a chest freezer below. The upright section has glass doors and shelves, while the chest freezer has a glass top for viewing contents.

Product Overview

Versatile Dual-Zone Storage

This combination unit integrates an upright freezer showcase with a chest freezer base, providing a comprehensive solution for commercial retail environments. The upper section features a two-door glass display for organized product visibility, while the lower chest section offers deep storage capacity with a convenient glass top. Designed for efficiency and accessibility, this unit maximizes floor space while ensuring optimal product presentation.
