

Combination Woodworking Machine

This woodworking machinery integrates several functions into a single unit. It features a table saw, planer/jointer, and a mortising/tenoning mechanism for versatile woodworking tasks.

Overview

Versatile Multi-Functional Solution

This combination woodworking machine integrates multiple core functions into a single, compact metal frame, making it an ideal choice for professional workshops with limited space. By merging saw, planer, and mortising capabilities, it streamlines production workflows and ensures precise results across various wood processing tasks. The machine features intuitive manual adjustments and robust construction, providing the necessary versatility for complex cabinetry and furniture fabrication.

Technical Features

Precision Controls

- Adjustment Knobs
- Control Levers
- Hand Crank
- Integrated Clamping System

Integrated Functions

Table Saw, Planer, Jointer, Mortiser, Tenoner

Construction Material

Reinforced Metal
