Product Overview

Efficient All-in-One Processing

The SB-50 Combined Rice Mill is a versatile, all-in-one solution designed for small to medium-scale rice milling operations. It integrates essential functions including husking, polishing, and separating into a single, robust unit. Engineered for reliability and ease of maintenance, this machine ensures high-quality rice output with minimal breakage, making it an ideal choice for farmers and millers.

Technical Specifications

Performance Highlights

50 SB

Model Series

Model

SB-50

Key Features

Integrated husking, Polishing, Separating, High-capacity hopper, Integrated blower system

Operational Safety

Safety Compliance

- Prominent danger and caution warnings
- Safety labels for operational awareness
- Pre-operation machine inspection required
