

# Combined Rice Mill

This combined rice mill is a complete solution for processing paddy rice into polished white rice. It integrates cleaning, destoning, husking, separating, whitening, and grading functions into one machine.

## Product Overview

### Combined Rice Mill Solution

This combined rice mill unit offers an all-in-one solution for processing paddy rice into polished white rice. By integrating cleaning, destoning, husking, separating, whitening, and grading into a single compact system, it maximizes throughput while minimizing floor space requirements. The unit is designed with advanced separation technology to ensure high-quality output with fewer broken grains, making it a reliable choice for small and medium-scale operations.

## Technical Features

### Processing Functions

- Cleaning
- Destoning
- Husking
- Separating
- Whitening
- Grading

### Key Advantages

Compact Design, High Efficiency, Minimal Broken Grains, User-Friendly Controls, Reliable Performance

## Operational Suitability

### Target Operations

Small-scale processing • Medium-scale processing
