

Combined Rice Milling Machine

This rice mill is improved based on market demand, integrating iron and sand roll technology. It offers simple operation, a high ratio of winnowed paddy, low rice temperature, low bran powder content, and bright, white rice quality.

Overview

Combined Rice Milling Solution

The Combined Rice Milling Machine is a comprehensive, integrated system designed for efficient rice processing. It streamlines the workflow by combining essential functions like cleaning, husking, separating, and polishing into a single, compact unit. Engineered for small to medium-scale operations, this machine minimizes grain loss while maximizing output quality, ensuring consistent performance through durable construction and user-friendly controls.

Performance Metrics

Output Capacity

600 kg/h

Min Output

700 kg/h

Max Output

Matched Power

71 KW

Main Axle Speed

1190 r/min

Technical Specifications

Ratio of Winnowed Paddy

18.5 %

Machine Weight

785 kg

Dimensions (LxWxH)

2800 x 1500 x 3100 mm
