Product Overview

Safety Monitoring Solution

The LX-GSV8 is a reliable combustible gas alarm designed for continuous indoor monitoring. It effectively detects gas leakage and triggers immediate sound-light alerts when concentrations exceed safe levels, helping to prevent fires and explosions. The device automatically resets to normal operation once gas levels drop, providing a seamless safety solution for residential or commercial environments.

Technical Specifications

| | |
|------------------|----------------------------|
| Power Source | 100-240VAC |
| Frequency | 50/60Hz |
| Rated Load | 1.5 W |
| Detectable Gases | LPG, Natural Gas, Town Gas |

Performance Metrics

Alarm Concentration

20 %LEL
