Product Overview

Reliable Gas Safety Solution

This wall-mounted combustible gas alarm is engineered to detect dangerous concentrations of gases such as natural gas or LPG. Designed for residential, hotel, and commercial building safety, it provides an essential early warning system to protect lives and property. The unit is capable of integrating with gas valves or exhaust fans for automated emergency response.

Technical Specifications

Detectable Gases	Natural Gas, LPG
Working Voltage	AC220V±15% / AC110V±15%, 50Hz~60Hz
Alarming Level	10 %LEL
Sensor Lifespan	>3 years

Performance Metrics

Alarm Sound Intensity

85 dB

Alarm Sound

Operating Environment

Parameter	Range
Temperature	-10 to 50
Humidity	<95% RH

Features & Compliance

Certifications

EN50194 • TUV Approved

Optional Features

- Gas shut off valve control
- Relay output
