

Commercial Air Conditioning Unit for Large Spaces

This commercial air conditioning unit is designed for large spaces. It features a robust construction with multiple fans for efficient cooling.

Overview

High-Capacity Cooling Solution

This commercial air conditioning unit is engineered specifically for large-scale environments, providing robust cooling performance for industrial and commercial facilities. Featuring a durable construction, the system utilizes multiple fans to ensure efficient airflow and temperature control. It is designed for rooftop installation, offering seamless integration with standard refrigerant and electrical power infrastructure.

Technical Specifications

Construction

Robust • Heavy-duty

Installation Type

Rooftop

Application

Commercial, Industrial, Large Spaces

Cooling Design

Multi-fan forced air system
