

Commercial Air Curtain

Centrifugal air curtain designed for commercial or industrial applications. Provides a continuous stream of air to prevent the entry of dust, insects, and drafts.

Overview

Professional Air Curtain Solution

This centrifugal air curtain is engineered for demanding commercial and industrial environments. It generates a continuous, high-velocity stream of air to create an effective barrier against dust, insects, and unwanted drafts. Built with durable materials and an efficient motor, this unit ensures reliable, long-term performance for high-traffic doorways and building entrances.

Technical Specifications

Key Features

- Continuous air barrier technology
- Dust and insect prevention
- Draft reduction
- Durable construction
- Efficient motor design

Design Type	Centrifugal
Applications	Commercial, Industrial, Doorways, Entrances
