

Commercial Air Curtain

This air curtain is suitable for both commercial and industrial applications. It provides a continuous barrier of air to prevent the exchange of indoor and outdoor air, maintaining a comfortable environment and reducing energy costs.

Overview

High-Efficiency Commercial Air Curtain

Designed for versatility, this air curtain creates a robust air barrier over doorways up to 4 meters in height, effectively preventing air exchange between environments to minimize energy loss. The unit features a durable metal construction for high-temperature resistance and is suitable for various commercial and industrial installations. Users can choose between standard and high-efficiency brushless DC motor options, which provide superior energy savings and extremely low-noise operation.

Key Features

Product Highlights

- Up to 4-meter installation height
- Durable metal construction
- High-temperature resistance
- Energy-saving brushless DC motor options
- Low-noise operation
- Wall-mounted application

Performance Metrics

Featured Performance

4 m

Max Installation Height

3000 m³/h

Max Air Volume

2000 RPM

Max Rotation Speed
