Product Overview

High-Efficiency Commercial Air Curtain

This commercial air curtain is designed to create an invisible barrier of air across doorways, effectively separating indoor and outdoor environments. By preventing the transfer of heat, humidity, insects, and dust, it helps maintain a consistent indoor temperature and improves overall energy efficiency. The unit features a durable, full-metal housing with a sleek, slim arc design, making it suitable for high-traffic areas such as retail stores, restaurants, and warehouses.

Design & Construction

Housing Material	Full Metal Housing with durable powder spray coating
Design Style	Slim body with unique arc design

Performance

Key Performance Traits	High Efficiency, Low Noise
Operation	Convenient manual operation with adjustable air pattern
