

# Commercial Air Handler Unit

This commercial air handler unit is designed for efficient air circulation and temperature control in large spaces. It features a durable metal casing, a high-performance cooling coil, and a multi-speed fan for customized airflow.

## Product Overview

### High-Efficiency Commercial Air Handling

This commercial air handler unit is engineered for efficient air circulation and precise temperature control in large-scale environments. Featuring a durable metal casing and a high-performance cooling coil, it provides reliable HVAC performance for offices, retail spaces, and industrial facilities. Its multi-speed fan allows for customized airflow, while the ceiling-mount design ensures space-saving installation and simplified maintenance.

## Performance Metrics

### Key Performance Indicators

#### Multi Settings

Fan Speeds

## Technical Specifications

### Installation Type

Ceiling Mounted

### Casing Material

Durable Metal

### Cooling Component

High-performance cooling coil

## Applications

### Suitable Environments

Offices, Retail Stores, Industrial Facilities, Commercial Buildings

## Key Features

### Core Features

- Efficient air circulation
- Temperature control optimization
- Customizable airflow via multi-speed fan
- Easy maintenance design
