

Commercial Air Purifier with Water-Based Filtration

This air purifier is designed for efficient air purification. It features multiple control buttons, digital displays for monitoring performance, and a flow meter for measuring air flow.

Product Overview

Advanced Water-Based Air Purification

This commercial-grade air purifier utilizes an advanced water-based filtration system to ensure efficient air quality management. Housed in a durable stainless steel cabinet, it is engineered for reliability in demanding environments. The unit includes intuitive digital controls and integrated flow monitoring, making it an ideal solution for businesses prioritizing high-performance air treatment.

Technical Specifications

Filtration Technology	Water-Based Filtration
Cabinet Material	Stainless Steel
Mobility	Casters, Portable

Control & Monitoring

Interface Type	Digital Display with Button Controls
Flow Monitoring	Yes

Connectivity

Water Connections

- Water Inlet
- Water Outlet
