

Commercial Automatic Orange Juice Vending Machine

This automatic orange juice vending machine is designed for commercial use, providing freshly squeezed orange juice on demand. It features a stainless steel construction for durability and hygiene.

Overview

Fresh Juice on Demand

This automatic orange juice vending machine is designed for high-traffic commercial environments, delivering freshly squeezed juice on demand. Its durable stainless steel construction ensures both hygiene and longevity, while the transparent storage container showcases the freshness of the oranges to customers. The system fully automates the peeling, cutting, and squeezing process, making it an efficient solution for supermarkets, restaurants, and convenience stores.

Technical Specifications

Model Number	2000M-3
