

Commercial Building Doors and Windows

Doors and windows are designed for installation in commercial buildings. The facade is characterized by its uniform design.

Product Overview

Modern Commercial Facade Solutions

These professional-grade doors and windows are engineered for large-scale commercial applications, providing a clean, uniform aesthetic suitable for modern office or residential complexes. The system features a consistent, high-density grid design that maximizes architectural symmetry while ensuring functional reliability. Designed for multi-story structures, these components offer a durable and scalable solution for architectural projects requiring repetitive, high-quality glazing.

Technical Specifications

Design Characteristics

- Uniform grid layout
- Repetitive architectural pattern
- High-density window arrangement
- Modern minimalist aesthetic

Installation Suitability

Curtain Wall Compatible • Facade Integration • Modular Configuration

Primary Application

Commercial, Office, Multi-story Residential, Architectural Facade
