Product Overview

Professional Carbonated Beverage Dispenser

This commercial-grade carbonated beverage dispenser is engineered for high-volume environments such as restaurants, bars, and cafes. It features an advanced cooling system and an electric pump control mechanism to ensure optimal energy efficiency and consistent drink quality. With its 304 food-grade stainless steel piping and durable exterior construction, this unit is designed for reliability, hygiene, and ease of maintenance in busy food service settings.

Performance & Features

Cooling System	High-performance refrigeration system
Pump Control	Electric pump control for energy efficiency
Temperature Monitoring	Yes
Display Features	Automatic water tank temperature detection and display

Construction & Design

Maintenance

- Removable drip tray
- Easy-clean stainless steel exterior
- Illuminated flavor display

Material Grade	304 Food-Grade Stainless Steel, Corrosion Resistant
Dispensing Capacity	3 valves
