

Commercial Cube Ice Maker

This commercial ice maker produces high-quality, uniformly shaped cubic ice. Its robust stainless steel exterior ensures durability and hygiene for reliable performance in demanding environments.

Overview

Professional Commercial Ice Solution

This commercial-grade ice maker is designed for high-performance environments such as restaurants, bars, and hotels. It features a robust stainless steel exterior for durability and hygiene, ensuring reliable operation in demanding settings. The unit offers efficient refrigeration for rapid ice production, while its insulated storage bin minimizes melting and maintains ice quality.

Key Features

Core Capabilities

- Computerized control system with fault detection
- Automatic over-load protection devices
- User-friendly operation interface
- Rapid ice production and dropping cycle
- Oil-resistant face plate treatment
- Self-cleaning function to minimize downtime

Ice Quality

Ice Characteristics

Clear, Solid, Pure, Uniform Shape

Installation & Logistics

Installation

Pre-tested at the factory; requires simple connection to water pipes and power supply.

Packaging

Air bubble film inner protection with wooden box outer casing
