

Commercial Dishwasher with UV Sanitization

This commercial dishwasher features a dual-chamber design for simultaneous washing and disinfection. UV light technology provides effective sterilization, ensuring hygienic cleanliness.

Overview

Professional Sanitization Solution

This commercial-grade dishwasher and disinfective apparatus is engineered specifically for high-demand professional kitchen environments. Featuring a robust dual-chamber configuration, it allows for the simultaneous washing and sterilization of utensils and dishware. By integrating advanced UV light technology, the unit ensures superior hygienic standards, making it an essential asset for facilities prioritizing cleanliness and operational efficiency.

Technical Specifications

Sanitization Technology

UV Light
