

Commercial Display Refrigerator with Split Design

This commercial refrigerator is designed for displaying and storing food products in retail environments. It features a split design with an open section for easy access and a sliding glass top section.

Product Overview

Commercial Display Efficiency

This commercial display refrigerator is engineered for high-traffic retail environments such as supermarkets and convenience stores. The innovative split design combines an open-access section for immediate product interaction with a sliding glass top section for temperature-sensitive items. Its clean aesthetic, featuring a white exterior with silver trim, ensures it complements any modern retail interior.
