

Commercial Drinking Water Chiller

This drinking water chiller is designed to provide a consistent supply of chilled water for various applications. It features a robust construction with a metallic frame and panels, ensuring durability and longevity.

Product Overview

High-Efficiency Commercial Chilling Solution

This commercial drinking water chiller is engineered to provide a consistent supply of chilled liquids for various applications, including milk, syrup, and other beverages. Featuring a robust metallic frame and panels, the unit is designed for durability and longevity in demanding environments. Its compact, mobile design with integrated casters ensures easy placement and efficient space utilization.

Key Features

Mobility

Caster Mounted • Compact Design • Mobile Unit

Control & Monitoring

- Digital control panel for precise temperature management
- Integrated system parameter monitoring gauges
- User-friendly interface

Technical Specifications

Supported Liquids	Drinking Water, Milk, Syrup, Beverages
Frame Construction	Robust metallic frame and panels
