

Commercial Dual Zone Induction Cooktop

This commercial induction cooktop features a durable stainless steel construction with both a square induction zone and a circular wok zone. It offers efficient and rapid heating, optimal cooking performance, and energy savings for professional kitchens.

Product Overview

Professional Dual-Zone Induction Performance

This high-performance commercial dual-zone induction cooktop is engineered for demanding professional kitchen environments. Combining a flat cooking surface with a concave wok zone, it offers versatile cooking capabilities alongside precise power control. Built with premium materials like Grade-A ceramic glass and robust stainless steel, this unit ensures durability, safety, and energy efficiency for high-volume operations.

Technical Specifications

Power Output

5000 W

Zone 1 Power

5000 W

Zone 2 Power

Voltage	220V - 240V
Frequency	50/60Hz
Power Adjustment Levels	10
Product Dimensions	860 x 505 x 200 mm

Construction & Design

Build Materials

- Grade-A Ceramic Glass Plate
- Stainless Steel Housing
- High-Performance PCB with IGBT

Cooking Surface Configuration	Flat Top, Concave Wok Top
Control Interface	Knob control with LED display

Safety Features

Integrated Safety Protections

Overheat Protection • Over-voltage Protection • Over-current Protection
