

Commercial Electric Deck Oven

This electric oven features stainless steel heating tubes for both upper and lower elements, ensuring high temperature resistance and durability. It distributes heat evenly with its insulated net, making it suitable for comprehensive baking applications.

Overview

Commercial Electric Deck Oven

The YMG-39 is a high-performance commercial electric deck oven designed for professional baking environments. Constructed with durable stainless steel for longevity and hygiene, this unit features three independent decks to maximize throughput. It is equipped with casters for easy mobility and insulated doors with viewing windows for precise monitoring of the baking process.
