

Commercial Electric Water Heater

This commercial electric water heater is designed for high-demand applications. It features robust construction and advanced heating elements for consistent performance and longevity.

Overview

High-efficiency commercial water heater designed for industrial facilities and large complexes.

High-Performance Commercial Heating

This heavy-duty electric water heater is engineered for high-demand applications, providing a reliable and efficient hot water solution for commercial facilities. Featuring a robust ceramic-lined tank and advanced Incoloy800 heating elements, it ensures consistent performance and longevity. With multiple power and capacity configurations, it offers flexibility to meet the specific requirements of restaurants, hotels, and large institutions.

Performance

Hourly Recovery Rate

- 140L @ 55 rise
- 186L @ 55 rise
- 232L @ 55 rise
- 280L @ 55 rise

Temperature Retention

Less than 7° drop after 1 night

Technical Specifications

Power Configurations

- 3 x 3.0kW
- 3 x 3.6kW
- 3 x 4.0kW
- 3 x 4.8kW
- 3 x 5.0kW
- 3 x 6.0kW

Available Tank Capacities

60L, 300L, 340L, 400L, 500L

Heating Element Material

Incoloy800

Construction & Insulation

Robust construction featuring energy-efficient insulation for high-demand environments.

Insulation Density	40 kg/m ³
Insulation Thickness	50 mm
Tank Lining	Titanium blue enamel coating

Compliance & Warranty

Compliance Standards

Drinking Water Standard • Enamel Solubility Y Class

Tank Warranty	3 Years
