

Commercial Espresso Machine

This professional-grade espresso machine is designed for high-volume beverage preparation. It features multiple group heads, stainless steel construction, and precise temperature control for optimal extraction.

Product Overview

Professional Commercial Espresso Solution

This professional-grade espresso machine is specifically engineered for high-volume beverage preparation in demanding commercial environments. Featuring a robust stainless steel construction, it ensures both long-term durability and strict adherence to hygiene standards. The unit is equipped with multiple group heads for simultaneous brewing, precise temperature control for optimal extraction, and versatile steam wands and hot water dispensers to meet all cafe and restaurant needs.
