Overview

Professional Commercial Cooling Solution

This commercial fan-cooled display refrigerator is designed for high-performance food and beverage preservation in retail environments. Featuring a robust fan-cooling system and energy-efficient Low-E glass double doors, it ensures consistent internal temperatures between 4°C and 8°C. The unit is equipped with a digital thermostat for precise control and includes high-quality components like a copper fin evaporator for long-lasting reliability.

Technical Specifications

Electrical Requirements

220 V
