Overview

High-Capacity Commercial Refrigeration

This four-door commercial refrigerator is engineered for demanding professional kitchen environments, offering superior food preservation through a forced-air cooling system. Constructed with durable stainless steel and a full foaming cabinet, it ensures long-term reliability and exceptional energy efficiency. The unit features precise digital temperature management and adjustable shelving to accommodate diverse storage requirements in restaurants and supermarkets.

Key Features

Core Functionalities

- Freezer/Chiller or Dual Function configuration
- Advanced digital temperature controller
- Reliable industrial-grade compressor
- Full foaming cabinet construction
- Inner copper pipe coil for efficient thermal exchange
- Auto-reset self-closing door mechanism
