Overview

High-Efficiency Commercial Heating

This commercial heat pump water heater is designed for high-efficiency, energy-saving performance, reducing energy consumption by over 75% compared to traditional heaters. It utilizes advanced geothermal heat recovery technology to provide reliable hot water without producing pollution or waste. The system is fully automated with intelligent temperature control and robust construction, making it an ideal choice for sustainable, low-carbon commercial applications.

Performance & Technical

Energy Efficiency

75 %

Consumption Reduction

System Capabilities

- Full automatic start/stop based on temperature
- Geothermal heat recovery
- Zero pollution emission operation
- Low-carbon operation

Operating Water Pressure

0.6Mpa - 0.9Mpa

Core Components

Copeland Compressor, Oversized Evaporator, LCD Touch Screen Controller

Logistics & Terms

Commercial Terms

Term	Detail
Minimum Order Quantity	3 Units
Warranty	14 Months
Lead Time	15 Days
Price Validity	1 Month

Payment Structure

- 30% Deposit upon order
- 70% Balance before shipping
